EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Bode on 04 March 2004.

As a preliminary matter there was a restriction prior to an agreement to cancel the non-elected claims as set forth below.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-9, drawn to a flotation apparatus, classified in class 209, subclass 170.
 - II. Claims 10-19, drawn to an air bubble infusers, classified in class 261, subclass 79.2.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination includes "equally spaced impinging plates" not required by the combination. The subcombination has separate utility such as an air infuser in a biological water treatment process.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with Mr. Bode on 04 March 2004 a provisional election was made with traverse to prosecute the invention of

group I, claims 1-9. Claims 10-19 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

The application has been amended as follows:

In the Claims: Claims 10-19 are canceled.

6. The following is an examiner's statement of reasons for allowance: Brooks (US 4212730) and Miller (US 4613431) disclose the closest prior art of record. Both fail to disclose or suggest the recited high volume bubble infusers including the "plurality of stationary impinging plates projecting from the interior circumferential wall into the circular cavity".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas M. Lithgow whose telephone number is 571-272-1162. The examiner can normally be reached on Mon. -Fri..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Blain Copenheaver can be reached on 571-272-1156. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
